

Infektions Schutzgesetz (InfSchG) §§ 42 und 43 / Infection Protection act

Welcome to the retraining of the infection protection act which has to be done every two years

Watch out! At the end of the film we will do a little test.

Who has to be trained?

Everybody in Germany
who works at the food
industry !!!

What it is about?

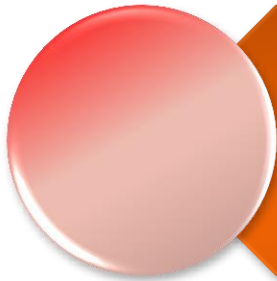

If an employee has certain diseases,
he is not allowed to work

&

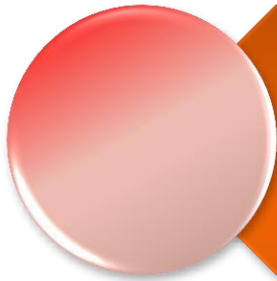

Transfer of ownership

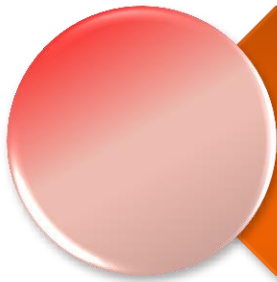

When do I have to stop working?

A stool sample has proofed pathogenic germs

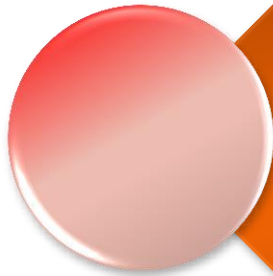

You have diarrhea with more than two thin fluid stools a day

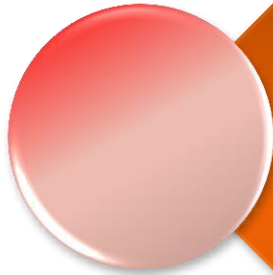

You have high ague with heavy head, abdomen and/ or joint pain

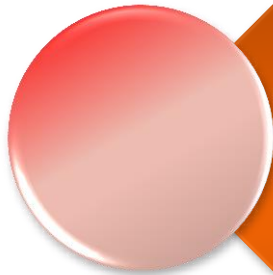

When do I have to stop working?

You have milky white diarrhea with a high fluid loss

You recognize a yellow colour of your eyes and your skin, you feel weak and you are anorexic

You have wounds or open parts of skin diseases, the skin is flacid, greasy watery and engorged. An useful bandage is not possible

What do I do with such evidence, or if I am not sure?

1. Inform your employer

2. Go to the doctor for a medical check up

3. Keep on informing your employer

How do I behave during a holiday trip

inform

- Before travelling, inform yourself, if an immunization is recommended

- Inform yourself about medical preventative measures

Watch yourself closely

- Keep an eye on relevant history of diseases

- If you have a suspicion- go immediately to the doctor

inform

- Inform you employer about relevant history of diseases

- Inform your doctor about relevant history of diseases (even if you feel better)

recapitulation

Diarrhea and stomach problems are serious. If you are not sure- go to the doctor. High fever is often a symptom of serious diseases. Watch your body.

Inform yourself about medical preventative measures and immunizations. If you are ill during your holidays visit your doctor at home before you start working.

Keep an eye on every little wound. Cover your wounds (even at your hands). You can use water resistant plaster or gloves.

Summary of the results

As an employee working at the food industry you have the responsibility that no other person gets a disease from you. Think of the infection protection act.

Take care with your health and watch out for signs of diseases within the meaning of the infection protection act.

Follow the hygiene instructions- always.

You have the responsibility. If there is a violation against the infection protection act you can be punished with a monetary penalty up to 25 000 € or either imprisonment up to 5 years.
